

Kristaps Tarasovs

Head of Engineering | Banking · Payments · Crypto & Trading Platforms London,
UK | 07575 964496 | me@christarasovs.com | linkedin.com/in/ai-engineer-tarasovs

PROFILE

Engineering leader with 14+ years of experience delivering high-impact products across banking, payments, and crypto trading. Track record of building and shipping trading platforms, payment rails, exchange infrastructure, and regulatory compliance systems for organisations including Deutsche Bank, SingularityDAO, BlockEx, and UK Government Digital Services. Combines deep frontend engineering expertise with the ability to own full product delivery end-to-end, from architecture to production.

EXPERIENCE

Head of Engineering | *Frontr Ltd*

Jun 2024 – Present

Led engineering strategy and delivery across the agency's client portfolio, overseeing architecture decisions, team standards, and technical quality across multiple concurrent engagements in fintech, payments, and enterprise sectors.

Head of Engineering | *SingularityDAO Labs*

Mar 2021 – Jun 2024

Led engineering strategy and execution across trading, risk management, and DeFi products, aligning technical delivery with business goals.

Owned the full delivery of trading dashboards, risk analytics tools, and portfolio management platforms used across the organisation's trading operations.

Built and scaled the engineering infrastructure end-to-end.

Lead Software Engineer | *Deutsche Bank*

May 2020 – Mar 2021

Regulatory, Compliance & Anti-Fraud (RCA) platform. Extended the internal component library, delivered backend microservice enhancements.

Lead Software Engineer | *DXC Technology*

May 2019 – May 2020

Built an insurance broker management platform now used by both internal and external clients.

Senior Software Engineer | *HM Courts & Tribunals Service (HMCTS)*

Oct 2018 – May 2019

Senior Engineer for the UK Government Digital Services department. Delivered core contributions to the GOV.UK Design System, now integrated across all UK government services.

Senior Software Engineer | *Black Swan Data*

Sep 2018 – Oct 2018

Built an in-flight payments platform for airlines, enabling passengers to make retail purchases during flight. MVP Product to showcase how we can take payments during flight. On completion was given to internal team to build due to confidential of information.

Senior Software Engineer | *BlockEx*

Feb 2018 – Sep 2018

Built and shipped a white-label exchange platform and a bonds trading platform from the ground up.

Senior Software Engineer | *Edenred*

Jan 2016 – Jun 2017

Built and maintained an employee benefits and payment rails platform.

Senior Software Engineer | *Profitable Web Project*

Sep 2011 – Jun 2015

Led the development of multiple web products for nearly four years, delivering eCommerce and CMS-based platforms.
